

INTEGRATED Pain Treatment Centers

Referring a patient is easy. 651-203-HOPE

We treat all patients experiencing pain. We are experts in acute to palliative and understand how to manage the care of the complex diseases that cause the pain. We offer treatment plans that are based on medical guidelines and include integrated clinical specialists, precision medicine and innovative therapies. Our focus is on keeping your patients safe, healthy and happy. If you feel your patient is a referral candidate, simply contact our Referral Specialist who will partner with you and your team.

What happens once the referral is made?

STEP 1: Scheduling an Appointment

PTC will contact your patient to schedule their appointment. Our Referral Specialist will notify you of the appointment date and any additional medical records that we may need.

STEP 2: Verifying Insurance

We will contact the insurance company on your patient's behalf. Once verified, we will contact your patient directly to discuss his/her benefits for all services offered through PTC.

STEP 3: Treatment Planning

At the appointment, your patient begins a comprehensive series of evaluations. He or she will then be offered treatment options tailored to his or her individual needs. PTC will keep you updated on your patient's status. Your patient's care team is available to you throughout the entire time that your patient remains with PTC.

STEP 4: Becoming a Patient

Once a pain treatment plan has been established to achieve decreased pain; improved function and ideal health, we will keep you updated on his or her status via medical records and consult notes. We will partner with you on all care items managed by your office.
